# End the enterprise contract back-and-forths.

Empower anyone to digitally send, sign and manage enterprise contracts anytime, anywhere, and on any device with DocuSign eSignature for Oracle Enterprise Contracts.

Background

DocuSign's integration with Oracle Enterprise Contracts (part of Oracle Engagement Cloud) saves time and money by replacing outdated processes such as printing, faxing, scanning, and overnighting documents with a fast, easy, and secure way to digitally sign and manage your enterprise contracts. DocuSign's eSignature service and the DocuSign Agreement Cloud platform enables every organization using Oracle Enterprise Contracts to accelerate the agreement process as part of a complete solution for electronic signatures and managing contracts.

Use Cases

With DocuSign eSignature, you can send contracts for secure electronic signature. Use cases include, but are not limited to:

NDAs

Contract Management

Internal Compliance

IP Licensing

Patent Applications

Board Minutes

Affidavits

Engagement Letters

Memoranda of Understanding

Key Capabilities

Automate the agreement process
Send documents out for signature without leaving the Enterprise Contracts application and manage the signature process with automatic updates of the contracts all within Oracle Enterprise Contracts.

Easy to set up and admin-friendly
Save your admins time and hassle, as your Contracts team gets up and running quickly with electronic signatures.

Improve visibility and drive contract compliance
Quickly see where you are in the agreement process, and implement standard, secure and legally compliant electronic signatures.

Accelerate contract negotiation and renewal cycles
Advance capabilities make it possible to quickly generate standards-based contracts for electronic signature.

World class security
DocuSign's security and operations deliver unmatched compliance with security standards. View all signature history and a complete audit trail.

Improve the employee experience
Keep your sales team happy and focused by giving them the modern tools they need to do their job quickly and efficiently. No more wasted time on outdated, menial, paper-based processes.

Store signed contracts centrally
DocuSign maintains all signed agreements in a single, secure repository.

Getting Started

1 Register and obtain a license from DocuSign, the supported and recommended third-party electronic signature service provider. Note details such as account ID, integration key, user name, and password from DocuSign.

2 Setup for this solution is performed within the Oracle Enterprise Contracts module. Please contact your Oracle Enterprise Contracts administrator.

3 Detailed setup information can be found here: https://docs.oracle.com/en/cloud/saas/engagement/19c/oacts/service-contracts-setup-checklist.html#OACTS2031787_3
