

DocuSign Gen for Salesforce

Make it easier than ever to process agreements.

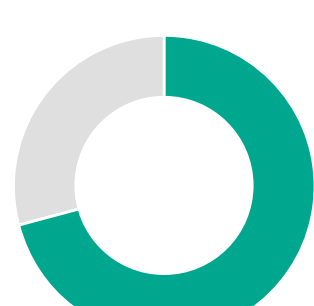

84%
Of agreements are still manual

84% of agreements are generated manually in some way.¹

50%
Experience frustration

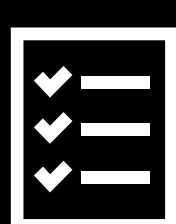

Half of sales organizations say their contracting process takes too long.²

71%
Impacted by inefficient processes

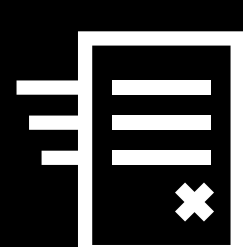

71% of B2B sales professionals report inefficiency due to manually entering information into contracts.²

DocuSign Gen for Salesforce empowers sales reps to create and manage agreements without ever leaving the Salesforce user interface.

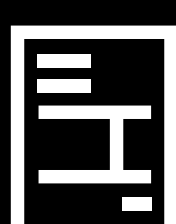

Create polished agreements

Seamlessly merge customer, product, and pricing data to generate agreements in Microsoft Word or a PDF.

Manage agreements in Salesforce

Control and configure the entire agreement process from Salesforce, saving your reps time and eliminating errors in the process.

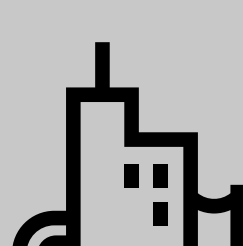

Create conditional content

Use a single template with conditional content, rather than managing many templates for different business scenarios.

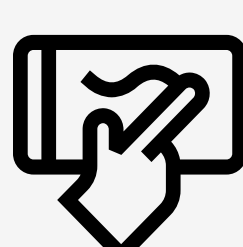

Close deals faster with DocuSign.

One-stop shop

DocuSign offers more than a dozen applications for electronic signature, document generation, contract lifecycle management, and more.

World-class mobile experience

DocuSign offers top-rated mobile apps so you can do business 24/7, from almost anywhere in the world.

Top Pick

With more than 3,000 5-star reviews on Salesforce AppExchange, leading organizations are choosing DocuSign for its unparalleled integration.
